

NUTRIFY

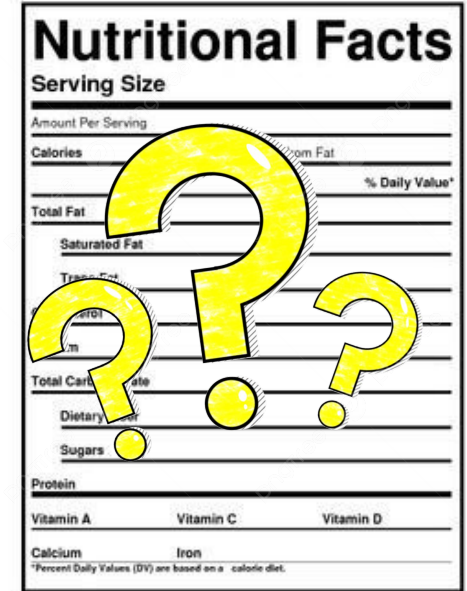

Group 8: Nathan Hum, Muhammad Huzaifah, Christina Zhang, Yash Patolia, Jasmine Wang, Justin Kwinecki

What is Our App?

Nutrify is designed to be a go-to platform for anyone seeking personalized, reliable nutrition advice—instantly. Whether users are striving to meet specific health goals or just looking for guidance

Nutrify provides a focused, supportive space where real questions get real answers tailored to individual needs.

Customize your own meal!

3 Experts

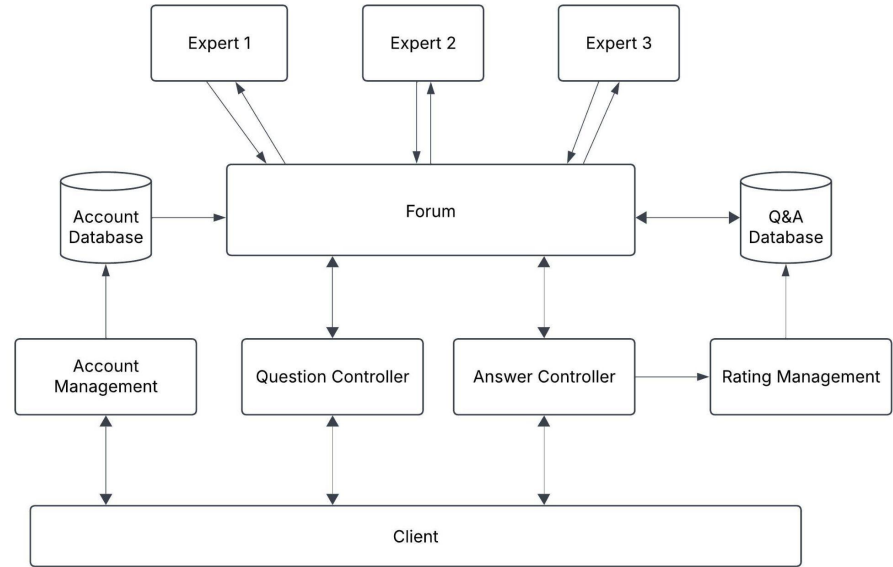

Nutrify consults three different experts for nutrition advice:

- AI Large Language Model (OpenAI)
- Specialized model built for nutrient analysis
- Nutrient database

An answer is reported based on one of the answers given by these experts.

Architecture

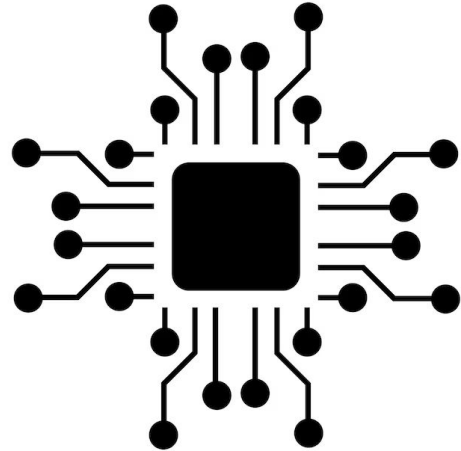

- **Blackboard Architecture** with central Forum
- 3 Knowledge Agents contribute insights
- Question & Answer Controllers manage data flow
- Q&A and Account Databases for storage
- Account Management handles authentication
- Rating Module improves answer quality
- Client Interface connects users to system

Subsystems

System divided into 4 main subsystems:

- Answer Management
 - Interacts with the experts for answers
- Question Management
 - Manages user questions and question database
- Account Management
 - Manages user accounts and account database
- User Success Management
 - Provides answer rating functionality

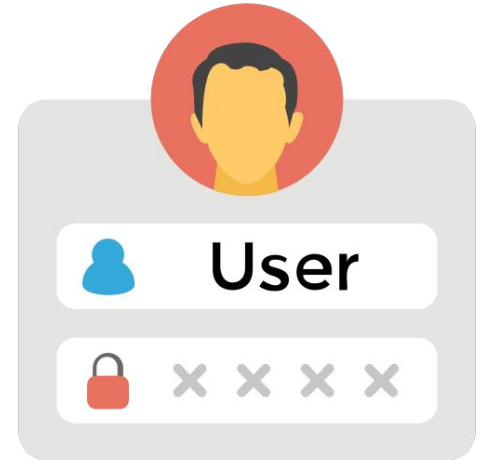

Flow of the App / How the App Works

In **Nutrify**, you can login to your account to personalize your user experience and ask questions related to nutrition.

Questions asked in **Nutrify** are saved and stored along with the answers so you can view them at a later date.

To provide the best experience, the information is provided from different sources ranging from Open AI models to our in house trained model.
